WHAT IS THIS PRODUCT?

Fund type: FDI BRD Acțiuni is an Undertaking for Collective Investment in Transferable Securities (UCITS).

Term: This product does not have a predefined term, but the minimum recommended term is of 5 years. However, the fund units can be redeemed at any time.

Objectives: Obtaining a long-term performance superior to the individual investment in stocks listed on the Bucharest Stock Exchange, the investment policy aiming to make investment mainly on the Romanian stock market. The performance of the product is closely linked to the development of the Romanian stock market indices. During a holding period below the recommended period, the product may have a higher volatility. The fund does not specifically track any index.

Instruments: The Fund mainly invests in Romanian shares, the long-term strategic allocation being of 90%. These instruments should not affect an investor's ability to redeem units on demand. The Fund does not distribute dividends, the profit obtained from the investment being reinvested in the Fund and included in the fund unit value that is published every business day. The fund can also invest in other categories of instruments, such as bonds and derivatives.

Markets: The Fund's investment is not limited to the Romanian market, but they prevail. Investment in securities from the European Union, the European Economic Area and non-EU Member States of G7 are also included.

Investor type: Given the Fund's objectives and investment policy, the Fund is addressed to investors interested in investing in the Romanian stock market in particular. As a result, the profile of the investor to whom the Fund is addressed is the one who has defined a long-term investment horizon and who undertakes the risks provided for in the prospectus.

Other information: The Fund's depository is BRD - Groupe Societe Generale. The documents and reports of the fund, as well as the latest fund unit values can be found at www.brdam.ro

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for the minimum recommended period of 5 years. The actual risk can be significantly higher if you keep the product for a shorter period than the minimum recommended and you may receive a smaller amount than the one invested. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.

The Fund is denominated in RON but also has classes in other currencies and their return may vary depending on the fluctuations of these currencies against the national currency.

The risks relevant for the Fund are not included in the synthetic risk indicator (SRI):

The liquidity risk - is related to the ability to meet payment obligations when they are due without incurring unacceptable costs. The Fund's investment will be made on different markets whose liquidity may vary. The conditions of reduced or null liquidity at a given time on one or more of these markets may have a negative impact on the fund unit value, especially in case of significant changes in its asset.

The operational risk - is the risk of a loss determined either by the use of inadequate processes, systems or human resources or that did not fulfil their function properly, or by external events and actions.

The likely estimated impact of the Fund's sustainability risks is medium.

This product does not include any protection against future market performance and therefore you may lose all or part of your investment. The tax legislation of the individual investor's home Member State may have an impact on the actual remuneration.

The figures shown include all costs of the product itself; but may not include all costs you pay to your advisor or distributor. The figures do not take into account your tax situation, which can also affect the amount you receive. What will you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. The unfavorable scenario occurred between 01.05.2011-29.04.2016 (class A), 01.04.2015-31.03.2020 (class E) for the recommended investment period. The moderate scenario took place between 01.08.2017-29.07.2022 (class A), 01.07.2017-30.06.2022 (class E) for the recommended investment period. The favorable scenario occurred between 01.02.2019-31.01.2024 (class A, E) for the recommended investment period. Markets could perform very differently in the future. The crisis scenario shows what you can achieve in extreme market circumstances.

WHAT HAPPENS IF BRD ASSET MANAGEMENT S.A.I IS UNABLE TO PAY OUT?

This product is not covered by any guarantee scheme. There is a potential risk of not obtaining the expected return and even of losing the initial investment. This risk arises from the financial instruments held in the Fund's portfolio, as a result of adverse changes in the creditworthiness of the counterparty or the issuer of a financial instrument, as they may end up not fulfilling their obligations on time or in their entirety.

According to the specific legislation, the assets of the funds are separated from the assets of the Manager, BRD Asset Management S.A.I. and are not affected in the event of the Manager's potential inability to pay.

WHAT ARE THE COSTS?

The person selling you this product may charge you other costs. In this case, it will provide you with information on those costs and show you the impact of all costs on your investment over time.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you own the product and the product performance. The amounts shown here are illustrations based on an example of an invested amount and on different possible investment periods.

Costs over time

We have assumed:

— In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario

— The amount of EUR 10 000/RON 50 000 per year is invested
